### PROJECTS

#### Shop2Home API

LINKS:  

This REST API was created by me individually for an ECommerce Project. This API handles all of the basic CRUD functions and implements my logic in it including user validation at each stage.

##### FEATURES :

- Role of the entire application's administrator.
- The user can make a purchase, add product to cart, payment etc.

**TECH STACK :** CORE-JAVA | SPRING BOOT | MYSQL | SWAGGER | LOMBOK

##### AREA OF RESPONSIBILITY :

- The admin has access to information on various customers, products and orders, etc.
- Only logged-in users with active session tokens can add, update details or, add products, and orders from the main database.

It is an individual project created by me in 10 days.

#### TripMaker API

LINKS:  

This REST API was created by us for an Online Trip Management System. This API handles all of the basic CRUD functions, including user validation at each stage.

##### FEATURES :

- Role of the entire application's administrator.
- The customer can register to book any trip.

**TECH STACK :** CORE-JAVA | SPRING BOOT | MYSQL | SWAGGER

##### AREA OF RESPONSIBILITY :

- The admin has access to information on various routes, buses, packages, ticket data, customer feedback, reports, etc.
- Customers can check the availability of hotels and travel packages.

A collaborative project cloned by 5 members with in 5 days.
