## ABOUT ME

Full Stack Developer with 2.6 years of experience specializing in Spring Boot and Angular. Adept at creating scalable APIs, integrating frontend with backend, and ensuring high-quality deliverables with tools like JUnit and SonarQube. Looking to leverage my expertise in a dynamic product-based company.

## EDUCATION

2022 - 2023

MASAI SCHOOL

### FULL STACK WEB DEVELOPMENT

Successfully completed 2160 hours of practical apprenticeship from MASAI .

2014 - 2017

University of Lucknow

### B.Sc in Computer Application

Successfully graduated from the University of Lucknow with a Bachelor's degree in Science, specializing in Computer Applications.

2012 - 2013

Uttar Pradesh Board

### Intermediate

Successfully completed intermediate with distinction in 4 out of 5 subjects

## EXPERIENCE

JAN 2025 - March 2025

Sileo Technologies Pvt Ltd

### Java Developer (Freelancer)

Worked as a freelance Java Developer on the Government Unified Disease Surveillance Platform (UDSP) Project, which is based on a microservices architecture. In this role, I collaborate with the team via Trello, where requirements are provided. Based on these requirements, I make necessary changes and updates to APIs.

JUL 2024 - OCT 2024

COLLABERA DIGITAL  
(Client: Deloitte)

### Software Engineer

In my previous role, I analyzed requirements from JIRA for each user story and addressed all related scenarios. I developed multiple GET, POST, PUT, and DELETE APIs and created test case scenarios for each API using JUnit and Mockito. Additionally, I ensured code quality by collaborating with SonarQube to maintain high standards.

APR 2023 - JUN 2024

ABP Education  
(Examfactor)

### Software Engineer

In this role, I designed and developed RESTful APIs using a Multi-Module Project structure and managed the development and maintenance using Couchbase database. I collaborated with the team to create and integrate multiple components for the LMS and Admin Portal using Angular 17. Additionally, I utilized JIRA to track and resolve assigned bugs, ensuring efficient project progression and maintaining quality assurance throughout the development cycle.

MAY 2018 - APR 2019

ECLERX SERVICES LTD.

### Junior Analyst

In this role, I developed APIs using Spring Boot, following the Model-View-Controller (MVC) design paradigm. I collaborated with team members, including designers and developers, to ensure project milestones were met on time. Additionally, I debugged and troubleshooted code-related issues, ensuring the application remained functional and free of bugs.

# CAREER BREAK (2019 - 2023)

---

2022 - 2023

## Upskilling and Transition

Focused on professional growth by pursuing a Full Stack Web Development course at Masai School, completing 2160 hours of practical training.

2021 - 2022

## Entrepreneurship

Started and managed a business, gaining valuable experience in business operations, problem-solving, and adaptability. A medical setback impacted operations.

2019 - 2021

## Family Responsibilities & COVID-19 Impact

Focused on family responsibilities while navigating the challenges posed by the COVID-19 pandemic.

## PROJECTS

---

### Unified Disease Surveillance Platform (UDSP)

A portal that tracks and treats diseases in Uttar Pradesh. It Connects public health facilities, laboratories, and private health facilities. Part of the Uttar Pradesh Medical Health and Family Welfare Department

#### Features :

- The UDSP portal is a one stop portal which has facilities for data entry, view reports, outbreak reporting, data analysis, training modules and resources related to disease surveillance.

**TECH STACK :** JAVA 8 | SPRING BOOT | TRELLO | POSTGRESQL

#### AREA OF RESPONSIBILITY :

- Working on multiple report APIs to fetch details of different cases, such as positive cases, case registry, cases in facility, etc.

### DELL USER PORTAL

A unified supply chain platform for logistics, integrating all sites and modules with widgets, providing a single location for all tasks without the need to navigate multiple platforms.

#### Features :

- Integrated real-time logistics updates across all sites.
- customizable widgets and dashboards that allow users to personalize their views and access the most relevant data efficiently.

**TECH STACK :** JAVA 17 | SPRING BOOT | ROBO3T | MONGODB | SONARQUBE | JUNIT

#### AREA OF RESPONSIBILITY :

- Developed the Reshuffle functionality for both sites and modules.
- Implemented multiple Fetch APIs for sites and modules based on various scenarios.
- Improved error handling and status codes for multiple APIs.
- Enhanced API logic based on evolving requirements and added validations.

## SOFT SKILLS

---

- Time Management
- Adaptability
- Problem-Solving
- Teamwork
- Remote Work

## TECHNICAL SKILLS

---

- **BACKEND DEVELOPMENT :** JAVA 17, Spring Boot, Spring Security, Hibernate, RESTful Webservices, JUnit
- **FRONTEND DEVELOPMENT :** Angular 17, JavaScript, Bootstrap
- **DATABASES :** MySQL, MongoDB, Couchbase DB, PostgreSQL
- **TOOLS :** SonarQube, Keycloak, JIRA, GIT

## CERTIFICATIONS

---

### FULL STACK WEB DEVELOPMENT (2022-23)

Successfully completed 2160 hours of practical apprenticeship from MASAI .

### Core Java + Advanced Java + Android

Successfully done all three programming language courses from DIGIPODIUM .
